

Please see below for the trades people installing. It is very straight forward and is normally complete by 3-4 people. Your trades people may wish to modify this depending on personal preference.

Typical assembly:

- Attach two opposite sides to the circular crown section.
- Erect the piece upright ensuring it is suitably balanced and supported.
- Attach the remaining two sides to the circular crown section.
- Attach the four supporting bars which strengthen the sides.
- The Gazebo is then ready to be set into the ground so that the supporting bars are flush with ground level .
